

SENIOR BACKEND DEVELOPER (.Net Core)

FULL TIME (40 H) IN HAMBURG | 15.06.2019

YOUR PROFILE

- Familiar with OOP and testing (e.g. C#, Java)
- Web backend development (e.g. Asp.Net, Java EE, Spring, Rails)
- Dependency injection / inversion of control frameworks
- Agile development (collective code ownership, etc)
- Experience with relational databases such as MSSQL, Oracle, MySQL, PostgreSQL

WHAT WE EXPECT

- Development and documentation of a new backend which drives mobile apps
- Concern for security when writing software which handles customer data

WHAT WE OFFER

- A highly motivated and interdisciplinary team
- Highly complex and exciting problems to solve
- Free choice of OS (Windows 10 or Mac OS)
- Office space in one of the coolest parts of Hamburg (Ottensen, Zeisehallen)
- Competitive salary

At Sympatient we help people with anxiety disorders to improve their mental health with mobile VR technology. This will enable millions of patients to access digital confrontation therapy on their smartphones. Do you want to **join us in our mission and help develop our backend?** Then join us and apply now!
