

WORKING STUDENT [WERKSTUDENTIN (D/W/M)] For Requirements Engineering PART TIME (20 H) IN HAMBURG / REMOTE | ASAP

YOUR PROFILE

- Currently a student at a German University
- Computer science or business informatics student
- First experience with requirements engineering (e.g. through university projects)
- Good communication skills
- Good written English
- Experience in working with structured documents (e.g. Markdown, Wikis, Jira or similar)

WHAT WE EXPECT

- Gather requirements for new as well as existing software products
- Document requirements in a markdown-based Wiki system

WHAT WE OFFER

- A young 15-people team with startup atmosphere
- A competitive salary
- You'll work closely together with the company's tech management
- Introduction to the different formal aspects of developing medical products
- You'll start a job that actually helps people improve their health

At Sympatient we help people with anxiety disorders to improve their mental health with mobile VR technology. This will enable millions of patients to access digital confrontation therapy on their smartphones. Do you want to join us in our mission and help develop our apps? Apply now by sending an email with your CV and a short motivational letter to jan-niklas@sympatient.com.
